

Success!

Date: April 2010

Name: Kathy
Condition: Frequent Headaches

Everyone takes drugs for headaches, right? That's what I did- for three years. After suffering for so long without any real improvement, I looked for something else, and found my way to Doctor Crowder.

I came to him with a bad headache, and when I left, it was much better. Now, I hardly even get headaches anymore. Also, the information given to me has been helpful in better understanding my health, and the staff is always kind.

I would recommend Doctor Crowder to people because he is a doctor who actually cares.
