

Success!

Date: May 2010

Name: Grady

Condition: Hip, Knee, and Shoulder Pain

I could not stand or even sit without pain. Getting in and out of bed was difficult for me. I received injections in my hip and back for the pain, but there was no improvement. This went on for four months before I came to Crowder Specific Chiropractic.

Amazingly, after my first visit with Doctor Crowder, I could tell that there was improvement, and I continue to improve weekly. I had learned to live with the pain, but now that pain is gone.

I have recommended Doctor Crowder to my friends, and will continue to recommend him to others.
