

Success!

Date: May 2010

Name: Gaylon

Condition: Hip Problem

About 7 years ago I made a great lay up while playing basketball, but overextended and landed on my back wrong.

I thought I was ok, but my hip really hurt so I did what everyone does and went to see my Family Practitioner.

With great intentions and a prescription or two later I set off on a 2 year ordeal. The hip was stiff and things just weren't the same. While medication helped with pain and inflammation, I knew this wasn't addressing the core issue...restored health!

My friend, Dr. Crowder, invited me to his practice and put the hip back into place. This started the recovery phase. A couple of weeks later and the pain and stiffness were gone. At last...sustained relief!

An added benefit is my ankles! Prior to chiropractic treatment they burned constantly from high school football days and injuries. It's amazing what you can get used to and ignore! Since receiving regular adjustments they hurt less and don't burn at all!

My health and wellness are important! I definitely recommend Dr. Crowder and his friendly staff to everyone!
