

Success!

Date: May 2010

Name: June

Condition: SI Joints

In October of 2007 my SI joints wouldn't stay in place and caused great difficulty in getting around, not to mention it was very painful!

After four months of not getting any better, I made an appointment to see a chiropractor nearby, but that wasn't working for me so I came to see Dr. Crowder.

The staff always treats me well and I was especially impressed with Dr. Crowder's genuine concern and caring nature. I felt like he really evaluated my situation and listened to my concerns.

Today, I have less pain and can get around better, and my S.I. joints are staying in place! I would highly recommend him to anyone!
