

Success!

Date: April 2010

Name: Larry

Condition: Foot Neuropathy

I came to Dr. Crowder with severe foot pain from neuropathy. I'd had the condition for five or six years and was tired of taking pain medication and seeing no measurable results.

My treatment consisted of spinal adjustments and laser therapy. Finally, the pain went away and I no longer needed medication. As long as I come for my regular adjustments and laser therapy I have no pain, but if I skip my appointments, the pain returns!

I would strongly recommend others to take advantage of Dr. Crowder's care and stick to the Treatment Plan!

Gratefully,
