

Success!

Name: Leo

Condition: Migraine Headaches and Sinus

I first started coming to see Dr. Crowder about three years ago for migraine headaches. The pain, nausea and sensitivity to light were excruciating. I couldn't sleep or eat, much less do anything else.

I'd read an ad about Sherry and how she got rid of her diabetes, did not need to wear glasses anymore and was off her medications. I figured, "what did I have to lose?" (My headaches as it turned out). So I decided to give this Upper Cervical Chiropractic a try.

After a couple of treatments my headaches were gone! Chiropractic saved my life! ***But it got better.***

As my treatment progressed I noticed that I was using less and less allergy medication, and then I was using none. **My allergies and sinus problems were just gone.** Dr. Crowder said that happens a lot, people come in for one thing and three or four other problems (sometimes things they did not tell him about) get better as well.

Unfortunately, I didn't continue with the once-a-month "Maintenance" Phase. The migrains and allergies returned over time. After two days off work I returned to see Dr. Crowder and entered into

Treatment.

Now, a couple of months later, I am doing WONDERFUL! My head is back on straight, energy and activity have increased, and I can run with the grandkids! This time, I plan on continuing with the Maintenance Phase.
