

# Success!

**Date:** April 2010

**Name:** Orville  
**Condition:** Lower Lumbar

**My lower back and legs hurt so badly it hindered my daily activities. Finally, after two years, the condition worsened to the point I sought vein replacement surgery in 2009 just to keep going.**

**The surgery didn't work in the long term, though. I was the worse off than before and this time there was no hope of a surgery to ease the pain. That option had been exhausted. That led me to Dr. Crowder!**

**My son saw an ad and sought treatment. My son's results were so good he called me and said it was worth a shot. I drove down from OK for a consultation and entered treatment immediately.**

**At first, I'd have to stand by my vehicle after the drive just to walk into the office. Now, a couple of months later, my lower back and legs are pain free most of the time and I anticipate them getting even better over time. He helped me**

**more than any one I've seen.**
