

Success!

Date: May 2010

Name: Stella
Condition: Lower Back Pain

Over the years I've had numerous back surgeries to treat my back issues. In December 2009 I had my sixth one and sought Dr. Crowder's care immediately during the recovery phase.

Now, I keep my appointments and with regular adjustments my health is slowly returning. I went from not being able to sit in a chair to sitting comfortably for longer periods of time! Meanwhile, I do not need medications and can continue my work.

Coming into the office is the best part of my day. The staff is wonderful and provides great care. They keep me moving and almost pain free. They are the best!
